

Project Report

1.Introduction

1.1 Overview

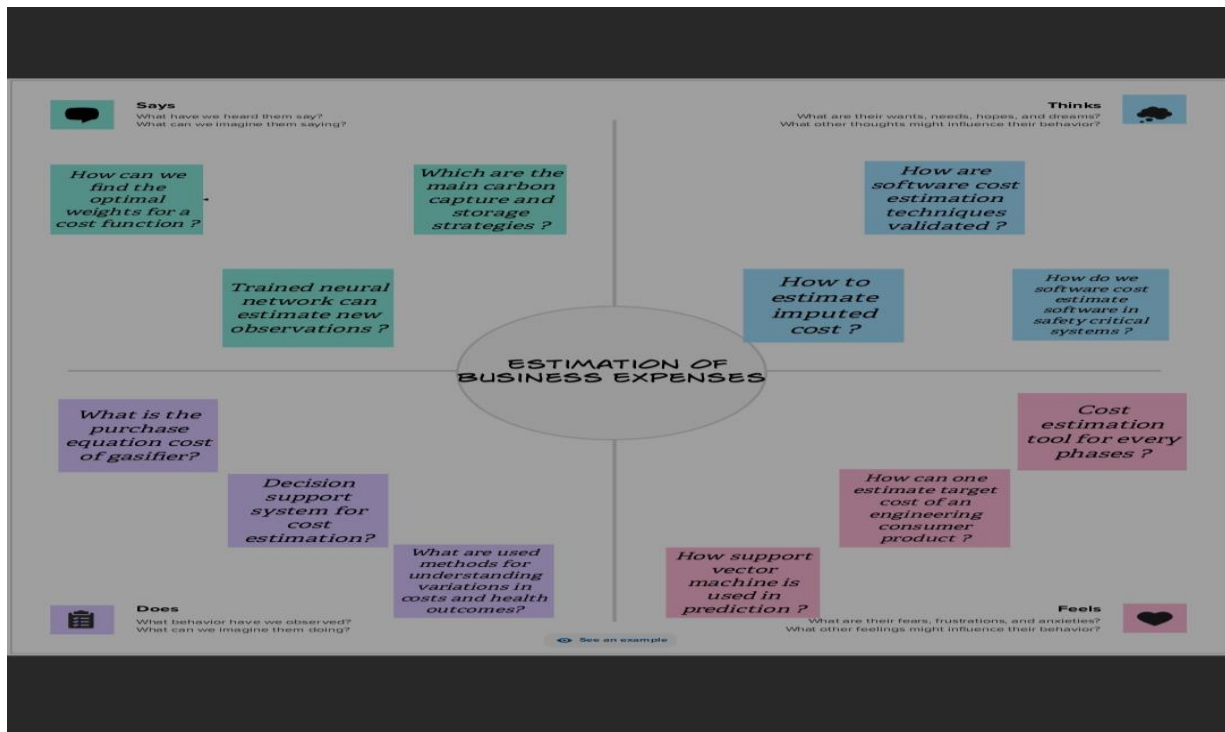

This report delves into the fascinating realm of business expenses and provides a visual exploration of the various expenditures incurred by different businesses. It showcases the distribution of expenses, identifies key cost drivers, and highlights areas of potential optimization or concern. The visual representations allow for intuitive analysis, facilitating a deeper understanding of expenditure patterns and their implications for business performance. Decision-makers, financial analysts, and stakeholders can gain valuable insights into the financial health of businesses, identify areas of inefficiency or opportunity, and make informed decisions to optimize resources and drive growth. To Extract the Insights from the data and put the data in the form of visualizations, Dashboards and Story we employed Tableau tool.

1.2 Purpose

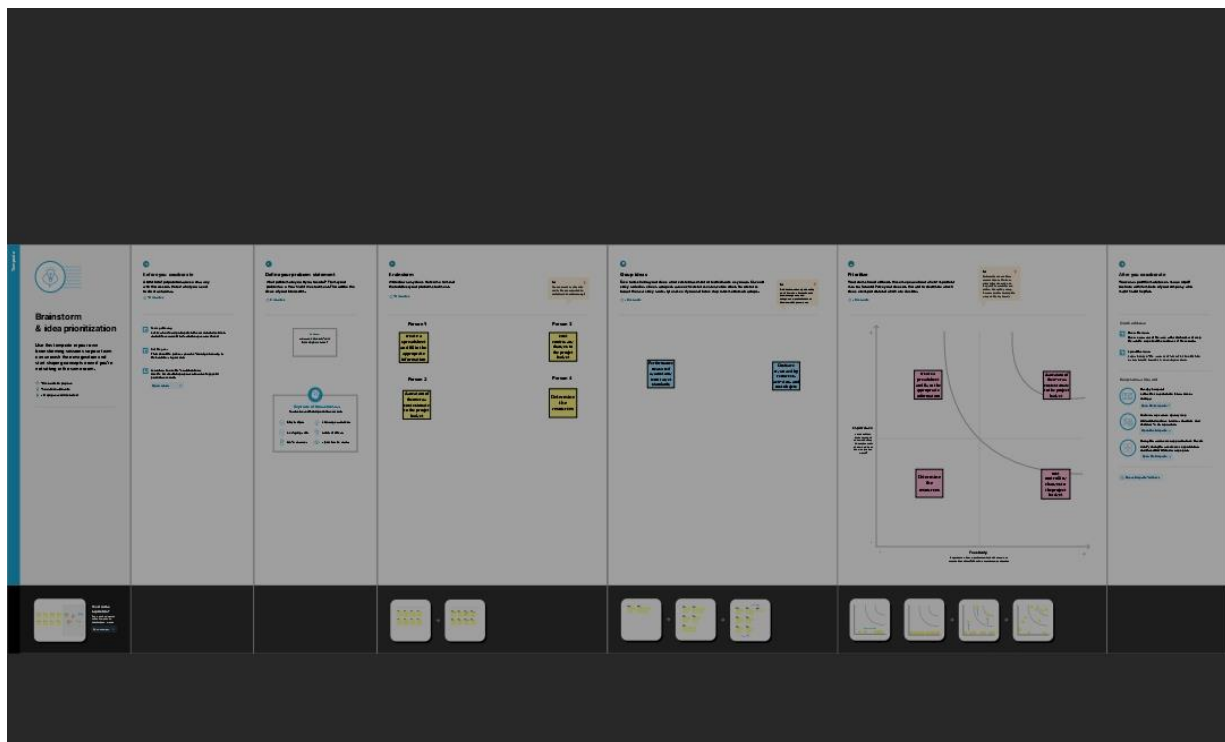

A business valuation is a useful tool used to compare similar businesses based on industry guidelines and financial, also known as bench marketing. Using industry bench markets to determine where you rank against other businesses connecting market performance can assist key decisions such as budgeting, sales forecasting or accessing finance.
