

Says

What have we heard them say?  
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?  
What other thoughts might influence their behavior?

*How can we find the optimal weights for a cost function ?*

*Which are the main carbon capture and storage strategies ?*

*How are software cost estimation techniques validated ?*

*Trained neural network can estimate new observations ?*

*How to estimate imputed cost ?*

*How do we software cost estimate software in safety critical systems ?*

*What is the purchase equation cost of gasifier?*

*Decision support system for cost estimation?*

*Cost estimation tool for every phases ?*

*How can one estimate target cost of an engineering consumer product ?*

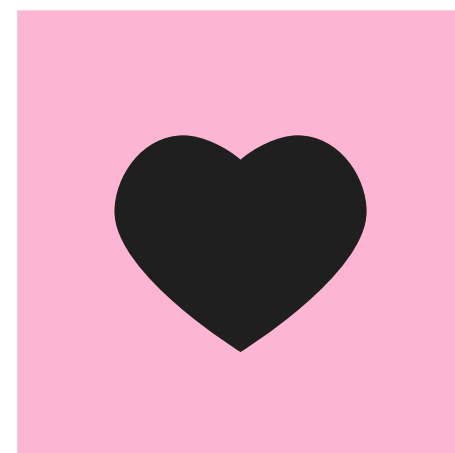

*What are used methods for understanding variations in costs and health outcomes?*

*How support vector machine is used in prediction ?*

Does

What behavior have we observed?  
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?  
What other feelings might influence their behavior?
